Delfin Srl, Italy

Quality. Design. Innovations. **For more than twenty five** **years.**

Delfin was created over twenty five years ago by the passion of its founder, Antonino Siclari, for the field of industrial vacuum. Since then it has never stopped working to offer innovative and efficient solutions to its customers. Today Delfin provides state of the art industrial vacuum solutions to professionals and industries around the world. Thanks to its innovative and entrepreneurial choices, the company represents the only industrial partner capable of providing a truly 360 degrees know-how in the field of industrial vacuums. With a range composed of more than 100 models, Delfin is always able to ensure the right solution in each application area.

Since 2009, it operates directly in the German market with a wholly owned branch, **Delfin Deutschland Industriesauger GmbH**.

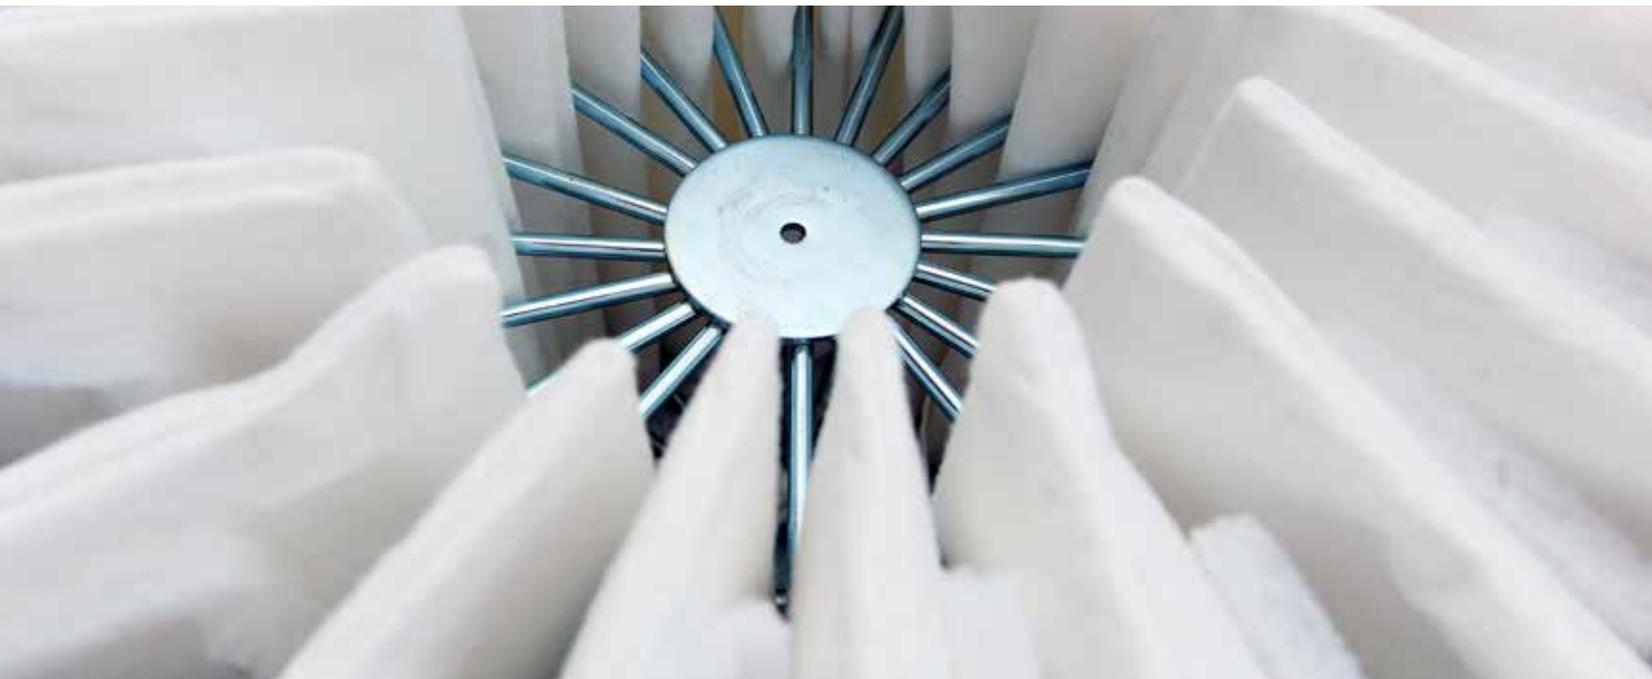

In 2013 Delfin opened a new branch, **Delfin Asia - Pacific**, in Vietnam in Ho Chi Minh City, in order to ensure a better distribution service across the South - East Asia and Oceania.

Solutions that improve efficiency.

Delfin's industrial vacuum cleaners are not simple vacuum cleaners but true industrial tools capable of increasing the efficiency of each industrial process, ensuring security and cleaning standards even in the most demanding environments. From the pharmaceutical laboratory to the foundry, from the small bakery to the largest automotive industry, our vacuum cleaners have solved and continue to satisfy the cleaning requirements of industries worldwide.

Reliability. Beyond all limits.

Discover the every day reliability of each Delfin machine. Each vacuum cleaner is the perfect combination of quality, safety and technology, but also because you have at your disposal a Unique service, attentive to your requirements and your needs. Additionally, Delfin gives you more, going beyond what is required by law. Each industrial vacuum cleaner, has a **2 year warranty** in the rare case of defective construction. All of Delfin's machines are CE marked and are assembled through a quality certified process to the ISO 9001 standard. Our new Explosion-proof line complies with NFPA standards.

Original spare parts. Because no one knows Delfin, better than Delfin.

Side channel blowers from 1 to 33.5 HP, spare parts for each single model , hoses of all diameters and length, and fast shipping are just some of the benefits you can expect from Delfin Industrial. Delfin's Original Spare Parts allow each vacuum to maintain its value and efficiency of the machine for which they were specially designed, while guaranteeing that a Delfin vacuum is always a Delfin.

Original accessories. As unique as your business.

Each Delfin vacuum cleaner can be configured and made unique, perfectly suited to your work. Designed specifically to enhance the functionality of each model, original accessories will enhance the comfort and the efficiency of use of any Delfin vacuum cleaner.

Made in Italy Excellence.

Absolute quality. Almost infinite life. Continuous Efficiency. This result is made possible thanks to constant investment in R & D and to direct and constructive dialogue with the customers. Our department of Research & Development, as well as ensuring the never ending development of the product, empowers the customization of machines and the creation of special designs, specifically designed on the customers' needs.

Excellence is not a word, it is a lifestyle. With this idea in mind our expert staff assemble, test and verify the correct operation of each small part of our industrial vacuums, from the first to the last machine. Delfin quality is not a promise, but a certainty. Each Delfin vacuum cleaner is built in Italy, with components Made in Italy or in Germany, through a process of production which has been certificated for quality by DNV with the ISO 9001.

DELFIN WORLD WIDE

Delfin Industrial is headquartered in Plymouth, MN to ensure fast shipping and service. Our production facilities are located in Settimo Torinese, near Turin (Italy). We operate worldwide through direct branches and official distributors.

Worldwide Delfin Locations

Delfin Industrial, located in Plymouth, MN, is led by an expert in the vacuum industry, Scott C. Boersma. Boersma, has partnered with Delfin Srl, and has brought Delfin Industrial Corporation to North America as COO/CSO September 1st, 2017. He has over 17 years' experience in technical industrial sales, extensive knowledge of combustible dust, and a high-level understanding of the industrial vacuum market in the US.

“Scott’s reputation preceded him; many years before our first contact, we knew him not only as a great sales manager, but as a highly knowledgeable expert in our field. His record of achievements in national sales, and his multiple skills, ranging from technical to sales and management made him the perfect fit to kick-start the development of the project in the US.” - Dimitri Di Salvo (Managing Director for Delfin Srl Italy)

“We are building a team of highly motivated and excited employees that are committed to our vision and core values. It is our intent to seek to understand customer needs in the market and form solid partnerships, which will enable us to provide a complete safe solution for mitigating combustible dust. Our strategy is specific to building a core foundation that will allow us to fill the increasing demand in the marketplace, due to changing regulations and standards.”- Boersma

Delfin’s entry will change the market of industrial vacuuming and dust extraction. Delfin not only brings new products and solutions to this market, but sets new standards with its flexible, consultancy, customer-oriented approach.

Applications

Plastic Industry

Glass Industry

Paper Industry

Wood Industry

Food Industry

Pharmaceutical Industry

Chemical, Oil & Gas Industry

Construction / Surface Preparation

Metal Working / Foundries / Cement / Ceramics

OEM (Fixed Vacuum Units)

Waste Management / Recycling

Car Wash / Vehicles Cleaning and Maintenance

Military

Marine / Shipyards

Engineering / Mechanics

Options

Automatic reverse pulse filter cleaning system

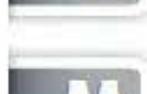

ELF Extra Large Filter, enlarged filtration surface.

Automatic Filter cleaning system.

Class H Filter for fine or toxic dust (efficiency 99.995% - 0,18 μ).

Class M Filter (efficiency $\geq 1\mu$)

Longopac[®] System

Antistatic/Grounding

Nomex filter, resistant to high temperatures up to 482°F

NFPA Compliant

Floating device for motor protection from liquids.

Toolman wheels, tires for uneven surfaces

Stainless Steel

Polytetrafluoroethylene, film cover that facilitate the detachment of wet, foamy or muddy materials from the filter.

Our focus is your safety, one dust particle at a time.

Safety is not just an abstract concept but a real philosophy at Delfin. From engineering to certification, our goal is to provide our customers with state of the art, safe, user-friendly extraction solutions.

	Class	Division	Group
Gases, vapors, & liquids	I	Div 1, NORMALLY PRESENT	A, B, C, D
	I	Div 2, ABNORMALLY PRESENT	A, B, C, D
Dusts	II	Div 1, NORMALLY PRESENT	E, F, G
	II	Div 2, ABNORMALLY PRESENT	E, F, G

Dust Category

Dust class	Filter Class	Maximum permeability
L low risk	L	< 1%
M medium risk	M	< 0.1%
H high risk	H	< 0.005%

Mistral

Compact Vacuum System

MISTRAL/ 301 DS

12

10.7 ft² filter class M certified

1 powerful Lamb-Ametek by-pass motor

- Delfin's most compact dust extractor*
- suction generated by a powerful single phase motor
 - extreme safety offered by a large surface industrial filter
 - DUSTOP filter cleaning system using pressure differential
 - possibility to recover of dust from power tools thanks to the automatic start / stop option
 - many possible configurations: HEPA filter, stainless steel construction, NOMEX filter, etc.

Detachable container for fast discharge

		301 DS
Voltage	V	115 1ph
Frequency	Hz	60
Power	HP (kW)	1.3 (1)
Water Lift	inH20 (mmH20)	98 (2500)
Air flow max.	CFM (m ³ /h)	106 (180)

IP-Class	CL	1
Dimensions	in (cm)	18x19x33 (46x48x85)

MISTRAL/ 501 WD

The most compact wet & dry vacuum system in the Delfin range:

- 100% steel construction (INOX available as an option)
- suitable for wet & dry service (floating device, wet PPL & dry starfilters included)
- hose for liquid discharge included
- compact and portable, ideal for cleaning contractors

MISTRAL/ 802 WD

Wet & dry vacuum system for any kind of application

- 100% Steel construction, compact and sturdy
- self cleaning dry double filter
- PPL anti-foam 300 micron wet filter
- floating device and liquid discharge hose

		501 WD	802 WD
Voltage	V	115 1ph	230 1ph

IP-Class	CL	1	1
Dimensions	n (cm)	30x16x35 (52x40x90)	21x26x43 (53x66x108)

Mistral

High performance compact vacuum system

MISTRAL/202 DS

14

DUSTOP filter cleaning system using pressure differential

2 powerful Lamb-Ametek by-pass motors

32 ft² filter class M certified

Additional H14 HEPA filter available as option

The Mistral 202 DS, compact and powerful, is the true best seller of the light industrial Mistral line. Its unique technical features make it the best vacuum system in its category, unmatched on the market. From food industry to construction, from pharmaceutical labs to surface preparation operations, the Mistral 202 DS continues to solve cleaning and dust extraction problems of industry professionals worldwide. No application is impossible for this great compact vacuum system.

- best filtration of the category
- direct bagging in disposable bags
- 100% steel construction
- DUSTOP filter cleaning system using pressure differential
- easy to use and transport

MISTRAL/ 202 DS LP

The perfect solution for a safer collection of dust

- ideal for construction and surface treatment applications
- safe suction of toxic and fine dust
- 5.5 gal. Longopac™ bag for safe collection
- DUSTOP filter cleaning system using pressure differential
- easy to use and to transport thanks to the height adjustment system

MISTRAL/ 20 DS ECO T/M

The most compact solution for continuous duty use

- highest filtration efficiency in its segment
- DUSTOP filter cleaning system using pressure differential
- suitable for continuous duty, three phase motor
- vacuum directly into disposable bags
- easily transportable

Mistral

Compact Vacuum System

MISTRAL/ 352 DS

16

Power tool electric socket, max 600 Watt

Detachable container for fast discharge

2 powerful Lamb-Ametek by-pass motors

High surface filter class L certified

Multifunctional industrial vacuum system

The Mistral 352 DS vacuum cleaner is ideal for cleaning and handling of small and medium amount of materials, particularly in the chemical-pharmaceutical industry, in the food industry and in the cereal milling industry. Extremely flexible and robust, it combines the sturdiness and performance of a true industrial vacuum system with an attractive look and an extreme ease of use.

Competitive advantages

- high level of filtration
- total steel construction
- integrated filter cleaning system
- option for detachable container to directly bag recovered materials
- filter efficiency sensor
- toolman version with tires for uneven terrain available
- simultaneous pick-up of solids, powders and liquids (with floating device)

352DS Toolman

High performance compact vacuum system

MISTRAL/ 4533 - 4534 - 4535

18

Powerful and silent side channel blower

The Mistral 4533 - 4534 - 4535 is one of the most compact and powerful three-phase industrial vacuum cleaners in the world.

- high level of filtration
- Sturdy steel construction
- integrated filter cleaning
- filter efficiency sensor
- extremely quiet
- ideal for 24/7 continuous applications

MISTRAL/ PHARMA 20 - 30

DUSTOP filter cleaning system
using pressure differential

32 ft² filter class M certified

Powerful and silent side
channel blower

The Mistral Pharma is an industrial vacuum system which has been engineered to the requirements of the pharmaceutical, chemical and food industries.

- best primary filter in its category
- suitable for continuous service
- direct bagging option
- total steel construction (304 or 316 available)
- integrated safety filter
- DUSTOP filter cleaning system using pressure differential
- extremely quiet
- Class II DIV. 1 & 2 versions available
- smooth surfaces/ easy to clean

High performance industrial vacuum system

DM/ DM3

3 powerful Lamb-Ametek by-pass motors
Made in America
800w motors = 115v plug

More reliable controls

Electric cable reel

High surface filter class L certified

Safety lock

Accessory and double bend housing

Detachable container with offset handles for easy disposal

Other version DM3 DUST H

Suitable for Class H toxic dusts

DM3 PN

Automatic filter cleaning system

TA.0181.0000 - Recommended accessories kit

DM3, the industrial vacuum system for excellence. There are no impossible applications for the DM3, from the laboratory to the workshop, from metal working to the cement industry. This model was developed in its first version, more than 15 years ago, to meet a wide range of requirements. It has been completely re-designed in order to make it even more user friendly and versatile, while improving its industrial design.

- wide range of applications
- simultaneous suction of powders, liquids and solids
- 100% steel construction
- innovative container detachment system
- integrated manual filter shaker
- large surface star filter
- optional extra large filter

		DM3

DM/ DM 40 OIL

3 powerful Lamb-Ametek by-pass motors

22

TA.0188.0000
Recommended accessories kit

8.6 ft² class L filter with additional anti foam filter

Detachable container for easy disposal

Visual liquid level indicator

The DM 40 OIL has been designed to meet the most demanding requirements of extraction and recovery of liquids, oils and emulsions, whether or not mixed with dust or mud.

- integrated sieve grid for shavings and oil filtration
- liquid level indicator
- possible to vacuum even dry materials, thanks to the additional polyester filter
- interchangeable motor head; single, three-phase or compressed air

ZEFIRO/ ZEFIRO 75

Electric cable reel

Accessory and double
bend housing

All the compactness of vertical industrial vacuum system with the power of a side channel blower. It is an ideal industrial vacuum for all applications where high performance and high mobility are required in relatively small spaces. The extreme flexibility of use allows this model to operate effectively and successfully in any industry.

- best seller in the three-phase vertical category
- continuous duty service 24/7 motor free of maintenance
- wide variety of application
- D50 kit recommended accessories (optional)
- 26 gallon detachable container

AS FIXE T/M

Suction, filtration and collection integrated unit

- single-phase or three-phase version, suitable for continuous duty applications 24/7
- can be fixed on walls or on metal frames (also on wheels)
- weighed flap discharge system
- remote control switch included (6.5ft. of cable as standard)

High performance three-phases industrial vacuum system

DG / DG 30 - 50 -70

DG certified for asbestos abatement

Accessory gasket

Power cord reel

Powerful three-phase motor

32 ft² filter class L certified

Safety Lock

Detachable container for fast discharge

The DG line is composed of industrial vacuum systems equipped with side channel blowers from 3 to 60 HP. These sturdy machines are ideal for the removal of solid materials, heavy dust, also mixed with solids.

Available with SPARK TRAP system for the safe suction of sparks and white-hot dust.

The DG is the direct result of Delfin's twenty years of expertise in the construction of three phase industrial vacuum systems. Like most of our vacuum systems these find application in almost any industry and professional sector. Large capacity, power and robustness make it a safe investment for any enterprise.

- the most compact of the three-phase vacuum system lines with motor in the rear cart
- maintenance-free motor
- high filtration efficiency
- robust, compact and easy to use

Heavy duty industrial vacuum system

DG HD/ DG 200 - 300 HD

34

Integrated compressor for the automatic cleaning of the filter

129 ft² class L filter

Incredibly powerful three phase motor

Detachable container for fast discharge

Best performing vacuum system in the Delfin range

Powerful, integrated automatic filter cleaning systems, these are just some of the reasons why the DG 200 and 300 HD are not only industrial vacuum systems, but real tools for material handling.

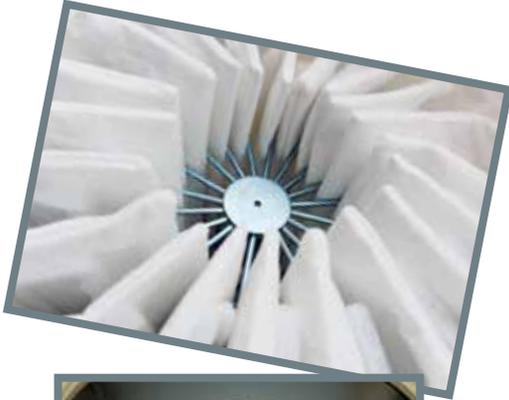

DG machines are capable of increasing the efficiency and productivity of any industry, from cement plants to foundries. Wherever there are large and heavy amounts of materials, even several cubic feet, these vacuums make the difference.

Ideal for being used as vacuum units on centralized vacuum systems in combination with Delfin’s filtering and separating units.

Features

- best power / filtration ratio in their category
- maximum portability and modularity
- machine designed for heavy industry
- automatic filter cleaning system as standard

TECNOIL/ TC 100 IF

40

Flux inversion liquids discharge system (26 gal/min)

Powerful three-phase motor

Visual liquid level indicator

Sieve grid for metal chip filtration with detachable container for fast discharge and floating device

The Tecnoil 100 IF was born from the need, developed in metalworking industries around the world, to acquire a powerful and compact vacuum cleaner, able to work in continuous duty applications, with low cost of purchase and maintenance. This model fulfills all of these needs, exceeding the expectations of operators around the world.

- maintenance free motors
- ideal for continuous duty applications
- detachable container
- sieve grid for the filtration of metal chips
- reverse air flow system for the fast discharge of liquids (26 gal/min avg)

TA.0190.0000 Recommended accessory kit

TECNOIL/ TC 100 IF DM3

41

The perfect combination of compact design, power and usability

- the most powerful single phase industrial vacuum in this segment
- independent discharge pump for reintroduction of filtered liquids
- options for oil filtration available from 300 down to 6 microns
- integrated sieve grid for oil / chip separation
- integrated level indicator and floating device shuts down system when tank is full
- powerful motor recycles 26 gallons of oil in 60 seconds

Powerful industrial vacuum system for oil, coolant and swarf

TECNOIL/ TC 200 IF

Flux inversion liquid discharge system(26 gal/min)

Powerful three-phase motor

Liquids container 53 gallon capacity with an automatic stop sensor for when the tank is full

Detachable container with integrated sieve grid for metal chips separation

Tecnoil 200 DM3

Thanks to the power and the enormous capacity of this machine, you can collect liquids, filter metal chips and pump oils or emulsions back into the machine tool in less than 5 minutes. This machine allows you to minimize the maintenance time, maximizing profitability.

- designed and built for the metalworking and mechanical industries
- large recovery container
- can filter the collected liquids from 300 down to 6 microns
- independent pump quickly empties the container (79 gal/min)

TA.0190.0000

TECNOIL/ TECNOIL 400 IF

The best sump cleaner for medium to large metalworking applications

- perfect combination of power, capacity and maneuverability
- flux inversion liquid discharge system (26 gal/min)
- independent discharge pump for reintroduction of filtered liquids optional
- integrated tilting hopper for easy disposal of solid material (chips, shavings etc.)
- integrated level indicator and floating device
- 360 degree machine access via pivoting hose connection

43

TECNOIL/ TECNOIL 600 IF

The most powerful and highest capacity vacuum in the Tecnoil range

- great performance even in continuous duty applications
- massive recovery capacity (161 gal.)
- powerful Independent discharge pump standard
- available option for oil filtration down to 6 microns
- able to recover large quantities of dense oil, swarf and sludge

Air powered industrial vacuum system

AIR/ AIR 50 WD

The most compact air driven vacuum system in Delfin range

- compact and portable
- suitable for wet & dry environments
- 100% Steel construction
- functional design for maximum ease of use
- ideal for service aboard ships and in shipyards

44

Delfin designs and manufactures a complete range of air powered vacuum systems (without any electromechanical component) of various capacities and ideal for multiple applications. Capable of vacuuming dust, solids and liquids, these vacuum cleaners are mainly used in industrial plants in, shipyards or on board ships.

These pneumatic vacuum systems are extremely safe, compact and don't require any routine maintenance. Ideal for shipyards, applications on board ships, oil platforms and in all the workplaces where air supply is preferable to electricity.

AIR/ AIR 80 WD 1V - 2V

Air powered industrial vacuum systems

AIR/ AIR 20 DS

46

Air powered industrial vacuum cleaner with unique features

- best filtration of its segment
- DUSTOP filter cleaning system using pressure differential
- detachable container
- direct bagging system available
- maintenance free Venturi suction unit
- light and portable

TA.0184.0000 - Recommended accessories kit

DUSTOP

The DUSTOP filter cleaning system was introduced by Delfin in order to provide a semi-automatic cleaning of the filters, with maximum efficiency and functionality. The DUSTOP allows the operator to clean, with great efficiency, the filter, with two easy actions

- 1) The operator plugs the vacuum (directly on the hose, with the cap on the suction inlet or with the special guillotine).
- 2) Without switching the vacuum off, the operator opens the flap placed on the chamber 3 to 4 times in rapid succession.

AIR/ AIR 352 DS 1V - 2V

Air powered industrial vacuum systems

- great suction performances
- available with 2 Venturi ejectors
- maintenance free Venturi suction unit
- integrated filter cleaning system
- compact and easy to transport unit
- detachable container with possibility of using disposable bags

Air powered heavy duty industrial vacuum systems

AIR/ AIR DM - AIR DM HD

48

Electric cable reel

Double Venturi Unit or Multi-jet unit

Class M certified filter

Accessory gasket and double bend housing

Detachable container for fast discharge, 26 gallon capacity

Two venturi ejectors or single multi-ejector unit, high filtration efficiency and 26 gallons of capacity make this model the flagship of Delfin's air powered line.

This machine has the best price / performance ratio in its category.

- the most powerful air powered vacuum among Delfin's range
- wide filtering surface
- ideal for shipyards, oil plants and platforms, ships

AIR/ 200 - 201

The most powerful and efficient air powered Delfin vacuum system

- great suction performance, ideal for heavy duty applications including shipyards and industrial sandblasting industry
- easy to transport thanks to the sturdy chassis and the forklift intakes
- self cleaning filtration system

49

self clean

Industrial vacuums for hazardous environments

When do I need a vacuum system compliant with NEC & NFPA requirements?

The standards certify the presence of the necessary requirements for vacuum cleaners, turbines and other components, allowing them to operate safely in case of the presence of gas, mist, and/or potentially explosive dust in the atmosphere.

* These vacuums are also certified ATEX in the European Union.

50

	Class	Division	Group
Gas, vapors, or liquids	I	Div 1, Hazard is normally present	A, B, C, D
	I	Div 2, Hazard is abnormally present	A, B, C, D
Dust	II	Div 1, Hazard is normally present	E, F, G
	II	Div 2, Hazard is abnormally present	E, F, G
Fibers and Flyables	III	Div 1 & Div 2	

Certifications for Hazardous Locations:

UL 1203 and CSA C22.2 No. 25 and No. 30 (only explosion-proof and dust ignition-proof vacuums are covered by this assessment):

NEC 500

Class I, Division 1, Group D, T3

Class II, Division 1, Groups E, F, and G, T320°F

Class III

ISA 12.12.01-2016 and CSA C22.2 No. 213-16 (only dust-tight vacuums are covered by this assessment):

NEC 500

Class II, Division 2, Groups F and G, T320°F

NRTL Certified

Delfin industrial explosion-proof vacuum systems are Nationally Recognized Testing Laboratory (NRTL) certified, and are manufactured in order to avoid any risk of ignition in a potentially explosive environment. Each vacuum cleaner is designed to comply with higher standards, ensuring safety, quality and reliability. If you have to collect highly explosive dusts or need to use vacuum cleaners in potentially explosive atmospheres, our full range of NRTL-certified vacuum cleaners and accessories guarantees all the security and reliability you need.

Specific accessories kit

Intertek

NFPA Compliant

Delfin Industrial offers a wide range of industrial vacuum systems which are NFPA compliant. From the most compact, transportable and resistant machine to the large fixed central vacuum systems, in variations customizable to meet every need.

- fully bonded and grounded
- UL-certified* motor with power ranging from 2.5 to 25 HP
- antistatic M-Class filter as a standard
- H-Class HEPA filter as a standard in some machines, where use applicable
- non-sparking stainless steel AISI 304 or 316 construction available

Our vacuums comply with the National Electric Code - Also referred to as NFPA 70, NEC 500

* some motors may be certified by NRTLs other than UL.

Pneumatic NFPA compliant industrial vacuum systems

Compressed air industrial vacuum systems

Delfin certified air powered industrial vacuums systems guarantee the highest safety level thanks to the absence of any electrical component.

- outstanding suction performance thanks to the Venturi units (1 or 2 depending on the model).
- ideal for collection of solid and liquid
- available in both powder-coated steel or stainless steel
- anti-static filters with high filtration efficiency
- suitable for the 24-hour operation and maintenance-free
- ATEX certified available for all zones

52

Explosion protected Accessories Kit (TA.0199.0000)

Industrial vacuum systems for direct extraction on production lines

DIRECT X

Direct X (Direct Extraction) is the range of vacuum systems designed by Delfin to be equipped on the lines and production machinery of OEMs. These machines are designed to constantly recover processing waste, even in small spaces, thereby adapting to any application. Through its R&D department Delfin can customize these units, in order to tailor them on the needs and requirements of the customer, therefore obtaining a unit with unique features.

54

DIRECT X/ DX AS 10 - 20 - 30

Trims extractors for automatic packaging machine

- direct extraction of production scraps from production machinery or lines
- great capacity and working autonomy, 24/7 continuous duty
- maintenance free motor
- extremely silent
- nylon bag filter (class L) and integrated filter efficiency indicator
- possibility to customize the unit for integration / assembly into production machinery

DIRECT X/ DX AS 70

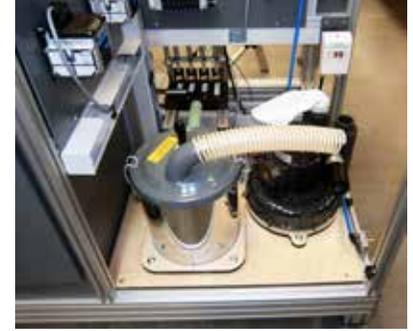

Trims extractors for automatic packaging machine

- direct extraction of production scraps from production machinery or lines
- great capacity and working autonomy, 24/7 continuous duty
- very powerful maintenance free motor
- extremely silent
- nylon bag filter (class L) and integrated filter efficiency indicator
- possibility to customize the unit for integration / assembly into production machinery

Flux recovery for submerged arc welding systems

ADVANTAGES

- modular construction and multiple design options
- flexibility provided by a research and development department able to develop solutions based on customer needs
- ability to co-design integrated systems with welding machine

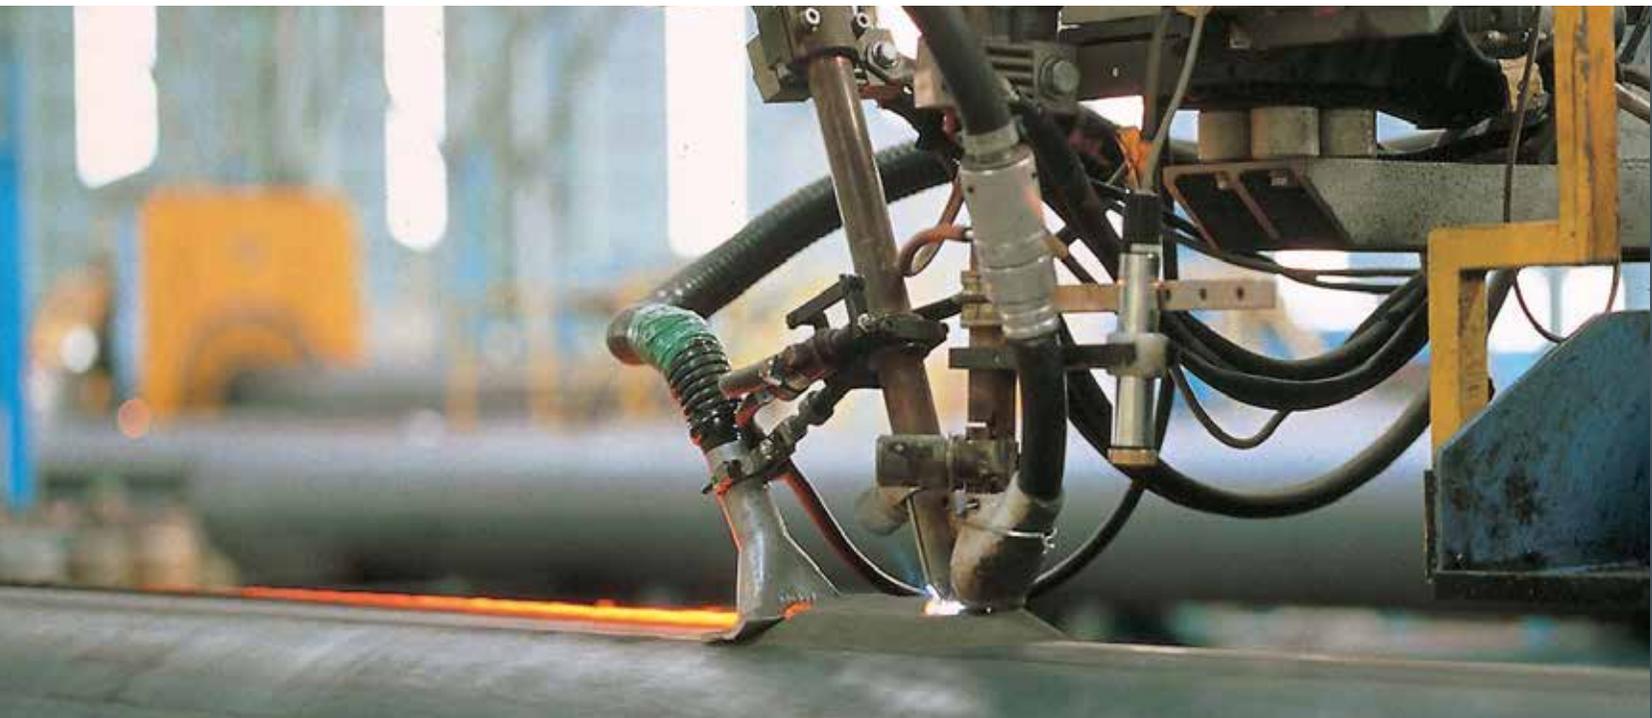

Fixed unit

Mobile unit

Two separate Units, complete modularity

Delfin designs and manufactures a wide range of flux recovery units specifically engineered for the recovery of welding flux, which are integrated in the welding machines. There are several solutions to choose from among, suction units, hoppers, mobile or fixed, which will surely be able to meet and exceed the expectations of workers worldwide.

- different solutions depending on the needs
- integrated on a single frame (fixed or mobile)
- completely customized solutions on demand
- hopper for flux separation
- drain valve for re-use of the flux

Industrial vacuum systems for lab control

The main feature of lab control is the presence of very pure air, with a very low levels of airborne dust microparticles. This type of laboratory is used in the field of chemical production, pharmaceuticals, precision mechanics and electronics.

60

The purpose of lab control is to preserve the processes that occur within them from contamination. The use of properly designed and manufactured industrial vacuum systems is essential for the proper maintenance and sanitation of these areas.

Delfin's vacuums for lab control are engineered based on the unique requirements of the users. A range of specialized models are available for the extraction of solid, dusty, humid or liquid materials.

CR / CR1000D - CR1100WD - CR1100S

CR1000D

- total construction in stainless steel
- autoclavable (up to 248°F, except engine head)
- compliant with GMP standards
- powerful and compact
- possibility for bagging the suction material
- specific for aspiration of solids and powders

CR1100WD

- total construction in stainless steel
- autoclavable (up to 248°F, except engine head)
- compliant with GMP standards
- powerful and compact
- specific for the suction of damp or liquid materials, even if mixed with powders.

CR1100DS

- total construction in stainless steel
- auto clavable (up to 248°F, except engine head)
- compliant with GMP standards
- powerful and compact
- possibility of bagging in "safe-bag" for toxic waste
- up to 4 installable filters

		CR1000D	CR1100WD	CR1100DS

Industrial vacuum unit with high airflow

AIRFLOW/ EV 420 - EV AP 500 - EV AP 560

62

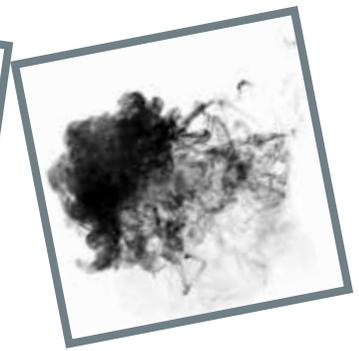

Industrial dedusters with high airflow

- 26 gal. removable container, it allows the easy disposal of the collected dust
- wide surface area filter
- integrated manual filter shaker, enables constant cleaning of the filter
- endless customization options thanks to a wide choice of filtration and automation options

Airflow is Delfin's range of dust extractors and dedusting systems. From the vacuuming of welding fumes, to the extraction and filtration of powders, the flexibility of the Airflow line allows us to always offer the most appropriate solution to the customer's needs.

Thanks to its R&D division Delfin engineers, proposes and installs centralized dedusting system and fumes extraction.

AIRFLOW/ EV AP 560 PN

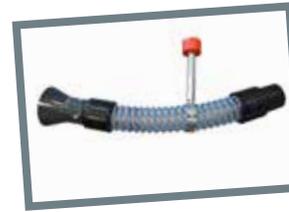

Industrial vacuum unit with high airflow and automatic filter cleaning system with reverse air pulse

- vacuum unit with high airflow
- reverse air pulse automatic filter cleaning system
- 26 gallon removable container, it allows easy disposal of collected dust
- wide surface area filter with 114 ft² of surface area

The Airflow EV AP 560 PN is the best combination of airflow and efficiency. It's equipped with an automatic filter cleaning system with reverse air pulse, also called PN system. The system consists of a compressed air container, which is placed behind the filter chamber. Every 30 seconds (depending on the settings), the system blows a 90 PSI strong blast of compressed air in the cartridge filters detaching the dust particles from the filter surface. This system allows an efficient cleaning of the filter cartridges without stopping the machine.

PRE-SEPARATORS

Delfin manufactures a wide range of containers, pre-separators and pre-separators with filter up to 264 gallons as standard (bigger capacity available on request). A pre-separator in conjunction with an appropriate Delfin vacuum system can double the efficiency of the system and extend filter life by decreasing the air load.

Mobile Pre-Separators

Pre-separators for hot materials

Tilting pre-separators, high capacity (106 - 158 gallons)

Separators with Longopac discharge system for floor preparation

Separators for the collection of explosive or flammable dust

Mobile pre-separators, customized according to client's requirements

Airflow between
80 - 600 CFM

Drum top pre-separators

Airflow between
120 - 300 CFM

Pre-separators with filters for solids, dust and liquids

Airflow between
180 - 350 CFM

ACCESSORIES

TECNOIL OIL AND SHAVINGS

These accessories are only a small selection of Delfin's wide range. Delfin can provide the right tool for every application.

ATEX

202DS KIT

ENGINEERING KIT

OVEN CLEANING KIT

ANTISTATIC KIT

Centralized Vacuum System allows you to easily clean a wide area and/or to transport the vacuumed material from one area to another, through a series of fixed pipings, accumulating and discharging them in a chosen point.

Delfin's centralized installations work with three main elements:

- 1) A suction unit, placed often at considerable distance (tens or hundreds of feet) from the point (or points) in which the suction of the material takes place;
- 2) A filtration unit;
- 3) A collection unit. Each CVS must be designed according to the specific dimensions and characteristics of the area in which it has to be installed, taking in account the required performances and the specific application.

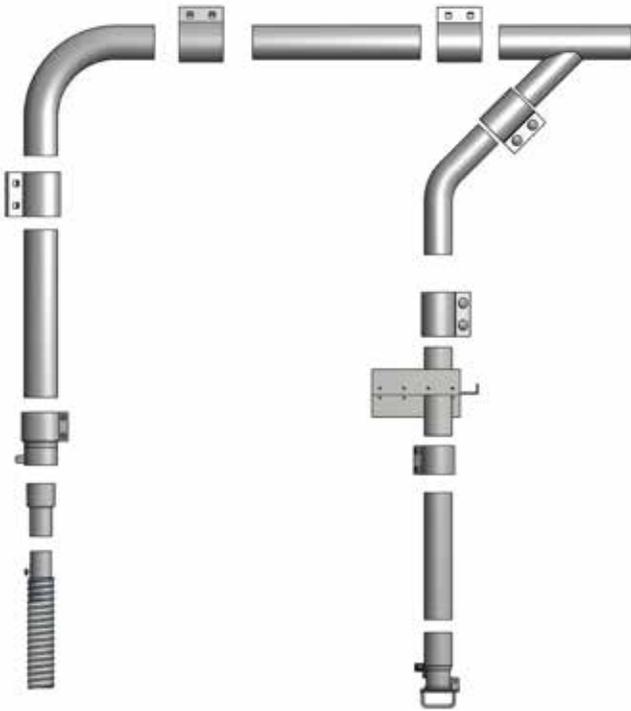

Filtering separators

Filtering hoppers with high capacity, up to 265 gallons

Customized piping systems

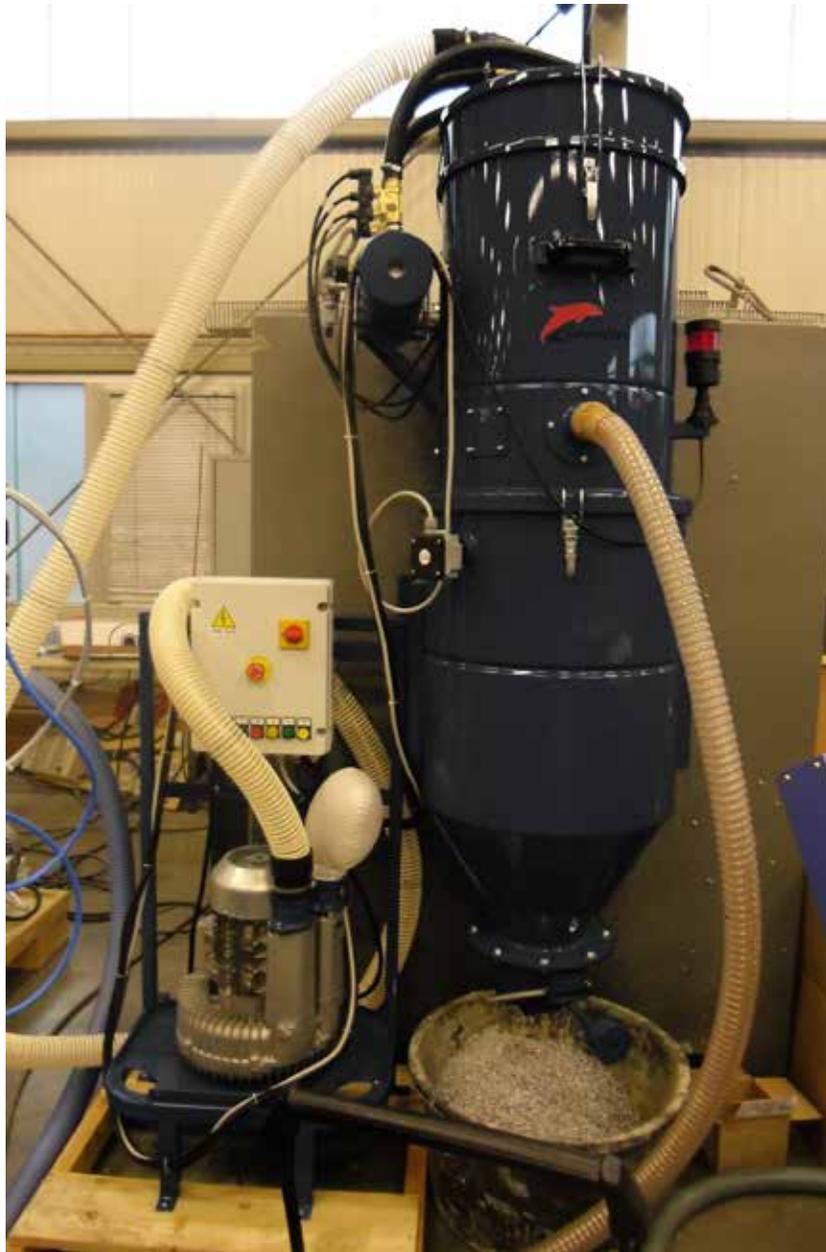

Centralized vacuum systems accessories

Delfin can provide all the necessary components for the realization of a centralized vacuum system. Pipes, vents, deviations in galvanized or stainless steel are ready to be shipped quickly from our warehouse.

Specialized frames for various mounting solutions

See what Delfin central vacuum systems can do

Delfin high vacuum suction units

Delfin's DHV high vacuum line is the result of 25 years of know-how in the most difficult application fields. These power monsters can be efficiently used in any industrial environment where it is mandatory to clean or move huge quantities of dusty, granular, liquid or muddy materials. In order to maximize efficiency, DHV units have to be used with appropriate containers or combined with separators of 265 gallons or more. Each DHV is a modular solution, customized on the specific needs of customers and can also be provided as truck or trailer mounted.

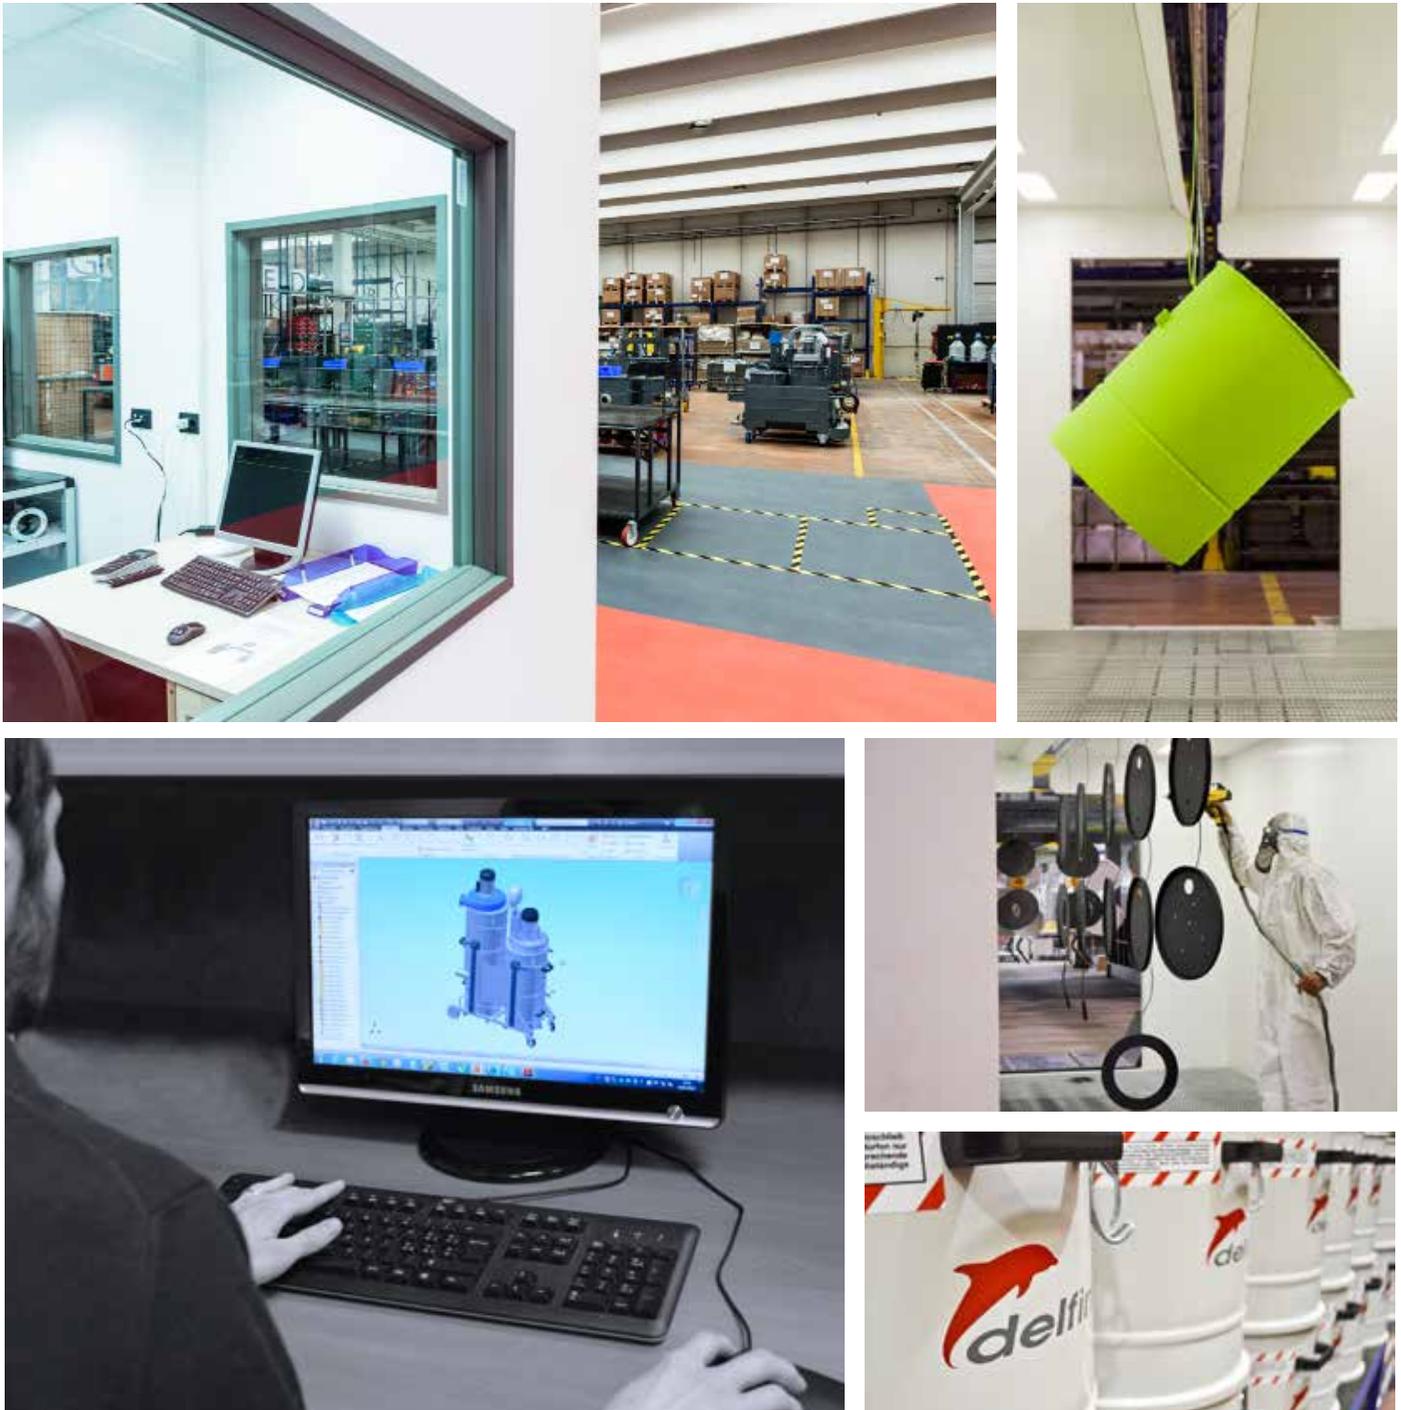

Customized solutions engineered to your specifications

Customized industrial vacuums: a world of possibilities

Delfin's wide range of standard vacuum systems does not meet all your requirements? Don't worry! Our engineers are always ready to develop a customized solution just for you. With more than 1,500 customized units already engineered, Delfin is the leader in tailor-made vacuum solutions.

With in-house R&D, powder coating, fabrication, and assembly, Delfin brings all innovative solutions to the market fast with premium quality.

72

Why should you choose a Delfin vacuum solution?

All the colors in the world

Thanks to our internal powder coating line, we can paint in any RAL color, as well as any custom color. We can make it possible in a very short time!

The automation you need

Our engineers assist our customers directly, in order to provide answers and solutions to the requests of automation on machinery and process lines.

73

Chosen by the best

Over the years our vacuum units have been chosen by the best Italian, German and other International OEMs. And not we are offering them in the US!

Always the right solution!

For example the SPARK TRAP system which was design in order to deflect and cool down sparks when vacuuming white-hot dust.

Infinite technical results!

Delfin's customized solutions are designed on your requests, grounded on more than 25 years of know-how and on the field experience.

Not "only" industrial vacuums... Delfin also designs pneumatic conveyors which are engineered and built to the specific requirements of the client.
