

Digital cutting machines are ubiquitous in packaging and advertising industries. They cut materials ranging from paper to plexiglas using advanced precision and speed, but one very big drawback is they can generate massive volumes of dust.

Delfin's digital cutting solution removes over 98% of the residual particulate matter by positioning a specially engineered vacuum system near the table with a flexible hose directly connected to the milling tool.

Why choose a Delfin Industrial vacuum system to compliment your digital flatbed cutter?

- ✓ Powerful & silent regenerative blowers
- ✓ Up to 30,000 hours expected run time
- ✓ Fast & efficient waste disposal
- ✓ Motor & filter protection
- ✓ 24/7 dust recovery with high suction
- ✓ Continuous filter cleaning during use
- ✓ Quality materials with low maintenance needed
- ✓ NRTL certified explosion-proof models available
- ✓ Advanced filtration with optional H14 HEPA

- No manual production cleanup
- Safer work environment
- More efficient user experience
- Better cut quality by removing dust
