

Preseparators

Additional systems to protect the suction unit

Vacuating or moving large quantities of dusty or solid material is not an easy operation. The solution is an industrial vacuum cleaner combined with a wheeled separator. Through this combination it is possible to significantly increase the autonomy of the aspirator and at the same to obtain greater efficiency of the material collection process.

PRE-SEPARATORS

Pre-separators for capacity increase up to 1000 liters

Pre-separators with Longopac safe collection bag

Water pre-separators for incandescent substances

Pre-separator lids

Wheeled pre-separators

Pre-separators for explosive dusts
